## Summary

More than ten years of design and multimedia experience working in video production and web development. Since moving to Denver I have worked with small and large companies with a focus on visual design and front-end development.

I want to be a key contributor to a brand/product management, design or development team, that cares deeply about accessibility, communication, and performance based UI/UX solutions.

## Skills & Abilities

### WEB DESIGN / FRONT-END DEVELOPMENT

**HTML5 • CSS3 • SCSS • JavaScript • CMS Integration**

I develop responsive UI display patterns with performance and accessibility in mind. I enjoy creating design systems, front-end architecture and inclusive UX. I am comfortable with modern front-end frameworks or can provide custom development.

**TOOLS:** *VS Code, Grunt/Gulp, Git/SVN, CodePen, Pattern Lab*

### VISUAL / USER EXPERIENCE DESIGN

**Branding • Logos • UI • IxD • User Discovery • Prototypes**

I have experience working in print, online and video design mediums. I believe that *good* research and discovery produce the best outcome. Communication is vital to my process and I enjoy working closely with creative teams to shape the final result.

**TOOLS:** *InVision, Sketch, Adobe CC (AE, AI, PS, XD)*

### CONTENT STRATEGY / ART DIRECTION

**IA • Wireframes • Layout • Styleguides • CMS Integration**

I find that concept creation and prototyping are the most exciting part in the design process. I build interactive wireframes and code based mockups and enjoy developing the creative direction behind the style and layout of page "content" or interactive elements.

**TOOLS:** *Adobe XD, HTML/CSS/JS, Kentico, Umbraco*

## Education

**B.S. Media Arts - Platt College, San Diego, CA**

Graduated 2005 - focus: Video Production / Motion Graphics

**A.A.S. Graphic Design - Platt College, San Diego, CA**

Graduated 2003 - focus: Graphic / Web Design

## Experience

**7/2015 - current**

**Freelance Designer - ethayer.co**

*UI/UX Designer / Front-end Developer*

- Produced 2 front-end design systems for rapid Kentico development
- Established custom CSS framework for rapid prototyping
- Developed front-end architecture for 3 startups
- Created interactive wireframe and HTML based prototype template
- Successfully revised 2 non-responsive code bases

**2011 - 2015**

**The Navigators - navigators.org**

*Lead Designer / Front-end Developer* - responsible for the design and development of organizational creative needs including: logo/branding creation, UI/UX design, customer support, client consultation and project management.

- Delivered 40+ responsive websites for internal departments and missions
- Optimized 20+ existing non-responsive websites for mobile use
- Created Bootstrap based framework for rapid Kentico CMS development
- Decreased development time with custom template system
- Eliminated the need for design and development outsourcing
- Established front-end documentation and guide lines for client discovery
- Served on IT department communications board

**2010 - 2013**

**Defense Language Institute - dliflc.edu**

*Multimedia Specialist* - responsible for the creation of training videos, motion/web graphics and iOS UI/content across multiple teams for the Department of the Army (Defense Foreign Language Center).

- Delivered 100+ training videos and graphic materials
- Contributed to the production of over 50+ iOS training applications
- Decreased graphic optimization time with custom process
- Introduced very first responsive website template system
- Optimized 5+ existing non-responsive websites for mobile use
- Awarded commendation of service for "efficiency" 3 times

**2005 - 2008**

**Multi-Image Productions - multiimage.com**

*Post Production Artist* - responsible for motion graphics, video editing and DVD authoring for live event production company for clients like: Pizza Hut, American Airlines, MasterCard, NCR and Pitney Bowes.

- Designed 20+ live event motion graphic themes and assets
- Produced 50+ DVD user interfaces and packaging templates
- Assistant video editor for a feature IMAX film Proud American
- Contributed on location shoots and with equipment setup and operation

## Training

**2013** - CSS Summit, CSSDevConf • **2014** - ArtifactConf + Atomic Design workshop, Platform14, SassSummit • **2015** - CSSDevConf, SassSummit

**2016** - RWD Summit, Front Utah, CSSDevConf (volunteer)

**2017** - SVG Summit, Front Utah
